Subject: HT.6038 - reply from a public authority

Dear ladies and gentlemen, dear colleagues,

The Austrian Competition Authority is not the addressee of the simplification package. Being however one of the authorities in Europe with a large number of national notifications it can perfectly understand the reasoning of the European Commission. It therefore fully supports the EC's initiative to simplify the notification procedure in the interest of resources of both the companies and the EC. In this way resources can be focused on cases that raise competition issues.

Yours sincerely,

Daniela Trampert
