Printed in Belgium.

The car price report, which is based on standardised data provided by vehicle manufacturers, provides manufacturers' recommended prices for about 100 car models of 25 different brands. Prices are given both excluding and including taxes, together with prices for the major options and right-hand-drive supplements. The report is published once a year. This initiative was launched following numerous complaints from consumers about differences in car prices between Member States and obstacles placed in the way of those consumers that wished to buy in another EU country
