

To whom it may concern:

Luxembourg would like to comment on the Commission's draft RAG which have been discussed on last's week multilateral meeting.

Luxembourg believes that the transparency requirements regarding individual aid granted under the new RAG should only apply if they exceed 500.000 euros. This is in line with the current rules under GBER, which have proven to strike the right balance between administrative burden and transparency to allow competitors to submit complaints to the Commission.
