Contribution of the Region of Western Macedonia to the Consultation on GBER

Scope

Usage of H<sub>2</sub> as an alternative fuel for energy production is a well promising application that contributes simultaneously in to issues: a) reduction of CO<sub>2</sub> emissions and b) Energy storage

In order to develop H<sub>2</sub> Production Units, facilities that use produced/stored H<sub>2</sub> for the production of Electricity for general use or as an alternative fuel in transportation, all bodies (producers, direct users) involved should be supported.

Suggestion

We propose that the text in case iv) of part A) of paragraph 5 of the article 56e (page 19) of the consultation document in English (p. 23 in Greek) the General Block Exemption Regulation should be modified as follows:

iv) Urban transport as well as Suburban transport for investments linked with H<sub>2</sub> usage.

George Kasapidis  
Governor of the West Macedonian Region
