Summary of case practice on modulation under point 61 (c) of the Temporary Crisis Framework

This document provides a non-exhaustive summary of the European Commission's case practice concerning the modulation of guarantee premiums depending on the guarantee coverage, the guarantee duration and the use of flat guarantee premiums in accordance with point 61(c) of the Temporary Crisis Framework.

The values in this document are indicative and are provided for information purposes only. They do not constitute professional or legal advice and do not give rise to legitimate expectations on the part of any Member State or undertaking. Table C presents the applicable (progressive) premiums for guarantees on loans with a maturity of up to eight years. A duration of the guarantee that is longer than six years is compensated with an increase of the premium starting from the first year.

| Table C | | | | | | |
|--------------------|------------------------------|-----------------------------|---|---|---|--|
| Guarantee coverage | Type of recipient | For 1 st year | For 2 nd -3 rd year | For 4 th -6 th year | For the 7 th -8 th year | |

For subsidised flat and progressive loans granted in accordance with point 64(c) of the Temporary Crisis Framework, Tables B, C and D above also provide insight into the Commission's case practice regarding the modulation of credit risk margins (to be added to the base rate), as the progressive credit risk margins applicable to subsidised loans in accordance with point 64(b) are the same as the progressive guarantee premiums covering 90% of the underlying loan for durations up to six years in accordance with point 61(b). In particular, the flat and progressive credit risk margins can be the same as the flat and progressive guarantee premiums that are applicable for guarantees covering 90% of the underlying loan for all durations up to eight years, as provided in Table B, C and D. The minimum all-in interest rate (base rate plus the credit risk margins) should never be less than 10 bps per year.
