

Review of the Communication on important projects of common European interest (IPCEI)

With reference to the public consultation "Revision of the Communication on important projects of common European interest (IPCEI)" and in particular with reference to art. 20 of the attached draft we ask you to take into consideration the following modification, which in the light of the **European Green Deal** would favor a strong acceleration in the achievement of the climatic neutrality and at the same time would bring financial virtuosity to the innovations that with an IPCEI Europe intends to develop.

ARTICLE 20:

The project must involve significant co-financing by the beneficiary.

PROPOSAL FOR ADDITION TO ARTICLE 20:

This co-financing can also be achieved by contributing "green" corporate assets by the proponents. These green assets are valued on the basis of the Carbon Footprint of the entire production process, in which these assets are used.

CONTRIBUTO ALLA CONSULTAZIONE:

Paolo Ciccolella, from the company: RB EUROSA Società Agricola a Responsabilità limitata.
