

Ministry of Enterprise and Innovation

Report on services of general economic interest 2020-2021

1. Overview of expenditure

| Table 1: Total SGEI government expenditure by legal basis (SEK million) | | |
|--|-------|-------|
| | 2020 | 2021 |
| <i>Total compensation for Services of General Economic Interest (1+2)</i> | 7 650 | 8 513 |
| (1) Total compensation granted on the basis of the SGEI Decision | 7 554 | 8 413 |
| (2) Total compensation granted on the basis of the SGEI Framework | 96 | 100 |

2. Description of the application of the 2012 SGEI Decision

2.1 Hospitals providing medical care, including, where applicable, emergency services (Art. 2(1)(b))

| Table 2: Compensation to occupational health care providers for the purchase of medical services |
|--|
| |
| Clear and comprehensive description of how the respective services are organised in your Member State |
| Explanation of what kind of services in the respective sector have been defined as SGEI in your Member State. Please list the contents of the services entrusted as SGEI as clearly as possible. |
| The aid is aimed at occupational health care providers. An occupational health care provider is able to seek reimbursement of its costs for the purchase of medical services from public or private health care providers. |

| |
|--|
| <p>‘Medical service’ means investigation and laboratory analysis, radiology and clinical physiology as a stage in assessing whether an employee is fit for work. The purpose of the aid is to prevent sickness and, in the event of sickness, to help the employee return to work. This is to be achieved by subsidising the occupational health care costs incurred in purchasing medical services integral to assessing an employee’s fitness for work. The aid is governed by the Ordinance on occupational health care subsidies for the purchase of medical services [förordning (2017:117) om bidrag till företagshälsovården för köp av medicinsk service].</p> |
| <p>Explanation of the (typical) forms of entrustment. If standardised templates for entrustments are used for a certain sector, please attach them.</p> |
| <p>The granting authority takes a decision on the payment of subsidies following a request from the occupational health care provider potentially entitled to subsidies.</p> |
| <p>Average duration of the entrustment (in years) and the proportion of entrustments that are longer than 10 years (in %) per sector. Specify in which sectors SGEI were entrusted with a duration exceeding 10 years and explain how this duration is justified?</p> |
| <p>A request for subsidies in respect of services provided during previous years must have reached the granting authority no later than 1 February. Subsidies are paid in arrears for each calendar year.</p> |
| <p>Explanation whether (typically) exclusive or special rights are assigned to the undertakings.</p> |
| <p>Not applicable.</p> |
| <p>Which aid instruments have been used (direct subsidies, guarantees, etc.)?</p> |
| <p>Direct subsidies.</p> |
| <p>Typical compensation mechanism as regards the respective services and whether a methodology based on cost allocation or the net avoided cost methodology is used.</p> |
| <p>Subsidies are granted in respect of the provider’s costs for purchasing medical services from a public or private provider. Subsidies are provided for one calendar year, the maximum amount concerned corresponding to the number of employees affiliated to the provider multiplied by the sum of SEK 100. The costs of general health checks are not refunded.</p> |
| <p>Typical arrangements for avoiding and repaying any overcompensation.</p> |
| <p>There is a ceiling of SEK 100 per affiliated employee (see previous question). A provider applying for a subsidy must provide proof of the amount it has paid for the service in question, and it has a duty to provide information to enable the aid to be checked and evaluated. There are</p> |

| | |
|--|-------------|
| provisions for the repayment and recovery of aid that has been granted if the beneficiary has failed to comply with its obligations. | |
| A short explanation of how the transparency requirements (see Article 7 of the 2012 SGEI Decision) for the aid above SEK 15 million to undertakings that also have activities outside the scope of the SGEI are being complied with. In your answer please also include some relevant examples of information published for this purpose (e.g. some links to websites or other references), indicate whether you have a central website on which you publish this information for all aid measures concerned in your Member State (and if so provide the link to this website), or alternatively explain if and how the publication takes place at the level granting the aid (e.g. central, regional or local level). | |
| Not applicable. | |
| Amount of aid granted | |
| Total amount of aid granted (in SEK million). This includes all aid granted in your territory, including aid granted by regional and local authorities. (A+B+C) | |

| 2020 | 2021 |
| 89 occupational health care providers were granted aid. Average amount of aid per care provider SEK 590 541. | 84 occupational health care providers were granted aid. Average amount of aid per care provider SEK 627 974. |

2.2 Social services (Art. 2(1)(c))

2.2.1 Access to and reintegration into the labour market.

| |
|--|
| Table 3. Compensation for creating meaningful and empowering work for persons with disabilities resulting in a reduced capacity for work (Samhall) |
| |
| Clear and comprehensive description of how the respective services are organised in your Member State |
| Explanation of what kind of services in the respective sector have been defined as SGEI in your Member State. Please list the contents of the services entrusted as SGEI as clearly as possible. |
| Creating sheltered employment for persons with disabilities. |
| Explanation of the (typical) forms of entrustment . If standardised templates for entrustments are used for a certain sector, please attach them. |
| Entrustment is carried out using an owner's instruction. |
| Average duration of the entrustment (in years) and the proportion of entrustments that are longer than 10 years (in %) per sector. Specify in which sectors SGEI were entrusted with a duration exceeding 10 years and explain how this duration is justified? |
| Usually for 1 year at a time, requiring an evaluation every 10 years before further entrustment. |

| |
|---|
| Explanation whether (typically) exclusive or special rights are assigned to the undertakings. |
| No exclusive or special rights are assigned to the undertaking. |
| Which aid instruments have been used (direct subsidies, guarantees, etc.)? |
| Direct subsidies. |
| Typical compensation mechanism as regards the respective services and whether a methodology based on cost allocation or the net avoided cost methodology is used. |
| <p>The compensation mechanism has been covered partly by the Ordinance on State compensation for Samhall Aktiebolag for a service of general economic interest [förordning (2018:1528) om statlig ersättning till Samhall Aktiebolag för en tjänst av allmänt ekonomiskt intresse], partly by Commission case SA.38469 – Sheltered employment in Sweden.</p> <p>The guidelines on providing compensation and what it can cover are laid down in Sections 6 to 10 of the Ordinance.</p> <p>Section 6 The compensation to be paid to Samhall for performing the task is decided before each calendar year. The Legal, Financial and Administrative Services Agency [Kammarkollegiet] shall pay the compensation in 12 monthly instalments.</p> <p>Section 7 The compensation shall not exceed Samhall's additional costs compared with the costs it would have incurred had the activities been performed without the requirement to employ staff with disabilities resulting in a reduced capacity for work.</p> <p>The company's additional costs are the sum of its total additional staff costs under Section 8, total additional staff-related costs under Section 9 and the costs of technical modifications under Section 10.</p> <p>Section 8 Samhall's additional staff costs are calculated as follows.</p> <ol style="list-style-type: none"> 1. Samhall's turnover in a given economic sector according to SNI, at two-digit level, is multiplied by the SCB quotient for that economic sector. This gives Samhall's estimated staff costs in that particular economic sector. 2. Samhall's estimated staff costs in a given economic sector are then subtracted from the company's reported staff costs in that economic sector. This gives Samhall's additional staff costs in that particular economic sector. |

3. Samhall's total additional staff costs are the sum of the additional staff costs in each economic sector in which Samhall reports activity.

Section 9 Samhall's additional staff-related costs are calculated as follows.

1. Samhall's estimated staff costs in a given economic sector are multiplied by the company's reported staff-related costs in that economic sector and then divided by the company's reported staff costs in the economic sector. This gives Samhall's estimated staff-related costs in that particular economic sector.

2. Samhall's estimated staff-related costs in the economic sector are then subtracted from the company's reported staff-related costs in the same economic sector. This gives Samhall's additional staff-related costs in that particular economic sector.

3. Samhall's total additional staff-related costs are the sum of the additional staff-related costs in each economic sector in which Samhall reports activity.

Section 10 Samhall's costs for technical modifications are the costs for special aids and adjustments to equipment, machinery, vehicles, premises, etc. required in order to enable the activities to be performed by staff with disabilities that reduce their capacity for work.

In addition, Section 14 specifies that the compensation paid to Samhall by the Social Insurance Agency [Försäkringskassan] in accordance with Chapter 33, Section 28 of the Social Security Code [socialförsäkringsbalk] should be included in the aid amount granted by the State.

The net avoided cost method has been used.

Typical arrangements for avoiding and repaying any overcompensation.

Strict requirements for detailed accounts, which are checked by the paying authority, as well as provisions on recovery. More detailed provisions on accounting and checks are included in Sections 11 to 14 of Ordinance 2018:1528:

Section 11 In the financial reporting in its annual report, Samhall shall declare the number of paid hours in the year covered by the report worked by staff employed in accordance with

1. Sections 25 to 27 of Ordinance 2017:462 on special initiatives for persons with disabilities resulting in a reduced capacity for work, and

2. Sections 37 to 39 of that Ordinance.

Section 12 In the financial reporting in its annual report, Samhall shall also state the following:

1. net turnover excluding excise duty

2. staff costs

3. staff-related costs, and

4. costs of technical modifications.

The statement referred to in the first paragraph, points 1 to 3, shall be broken down by economic sector at two-digit level based on the SNI in force at the time of the report. Economic sectors in which turnover is less than SEK 10 million may be reported under the appropriate combined SNI code at two-digit level.

Section 13 The Legal, Financial and Administrative Services Agency shall, each year, check that the number of paid hours reported in accordance with Section 11, Paragraph 1 and 2 is not less than the number indicated in the owner's instruction for the year covered by the annual report.

If the number of paid hours reported is less than the number indicated in the owner's instruction, the Legal, Financial and Administrative Services Agency shall recover compensation. The ratio between the amount recovered and the total compensation paid to Samhall shall be the same as that between the shortfall in the number of paid hours and the total number of paid hours which Samhall should have performed according to the owner's instruction.

The recovery decision shall be taken by 1 July of the year after the year covered by the annual report.

Section 14 Each year, when the SCB publishes the necessary business statistics, the Legal, Financial and Administrative Services Agency shall check that the compensation Samhall received for the year covered by the statistics did not exceed its additional costs for that year. When carrying out the checks, the Legal, Financial and Administrative Services Agency shall include the compensation paid to Samhall by the Social Insurance Agency in accordance with Chapter 33, Section 28 of the Social Security Code. In

addition, the Legal, Financial and Administrative Services Agency shall take into account whether any compensation was recovered for the year covered by the statistics.

If it transpires during the check that Samhall has received too much compensation, the Legal, Financial and Administrative Services Agency shall take a decision by 1 July to recover the excess amount. If the excess amount is less than 10% of the maximum compensation that may be granted under Section 7, the Legal, Financial and Administrative Services Agency shall instead deduct the excess amount from the compensation for the next year.

A short explanation of how the transparency requirements (see Article 7 of the 2012 SGEI Decision) for the aid above SEK 15 million to undertakings that also have activities outside the scope of the SGEI are being complied with. In your answer please also include some relevant examples of information published for this purpose (e.g. some links to websites or other references), indicate whether you have a central website on which you publish this information for all aid measures concerned in your Member State (and if so provide the link to this website), or alternatively explain if and how the publication takes place at the level granting the aid (e.g. central, regional or local level).

| | |

| Table 4: Compensation to employers for purchasing workplace rehabilitation support to make it possible for employees to return to work |
|--|
| |
| Clear and comprehensive description of how the respective services are organised in your Member State |
| Explanation of what kind of services in the respective sector have been defined as SGEI in your Member State. Please list the contents of the services entrusted as SGEI as clearly as possible. |
| <p>The aid is aimed at employers, who are able to seek compensation for a portion of their costs for services provided in the form of workplace rehabilitation support by occupational health care providers or by other providers with equivalent competences. ‘Workplace rehabilitation support’ refers to measures concerning an employee who has, or is in danger of having, reduced work capacity because of work-related and non-work-related sickness and injury. Such measures include reviewing, planning, initiating, carrying out and monitoring measures to make it possible for employees to return to work. Workplace rehabilitation support does not refer to medical or other treatment.</p> <p>The purpose of the aid is to prevent sickness and, in the event of sickness, to help employees return to work by supporting employers in taking appropriate measures in good time.</p> |

| |
|--|
| The aid is governed by Ordinance 2014:67 on subsidies to enable employers to purchase workplace rehabilitation support to make it possible for employees to return to work. |
| Explanation of the (typical) forms of entrustment . If standardised templates for entrustments are used for a certain sector, please attach them. |
| The granting authority takes a decision on the payment of subsidies at the request of employers who may be eligible for subsidies. |
| Average duration of the entrustment (in years) and the proportion of entrustments that are longer than 10 years (in %) per sector. Specify in which sectors SGEI were entrusted with a duration exceeding 10 years and explain how this duration is justified? |
| Subsidies are paid within 45 days of the request. A request for subsidies must have been made to the granting authority by no later than 1 February in respect of services purchased during the previous year. |
| Explanation whether (typically) exclusive or special rights are assigned to the undertakings. |
| Not applicable. |
| Which aid instruments have been used (direct subsidies, guarantees, etc.)? |
| Direct subsidies. |
| Typical compensation mechanism as regards the respective services and whether a methodology based on cost allocation or the net avoided cost methodology is used. |
| Aid is granted to an employer for a portion of its costs for services supplied by a provider approved by the granting authority. The aid granted corresponds to half the amount paid by the employer to the workplace support provider, with a maximum of SEK 10 000 per employee and per calendar year. Subsidies are paid up to a total of SEK 200 000 per employer and per calendar year. |
| Typical arrangements for avoiding and repaying any overcompensation . |
| According to the aid scheme, aid may be granted for, at most, half the actual costs (see previous question). An employer applying for a subsidy must provide proof of the amount it has paid for the service in question, and it has a duty to provide information to enable the aid to be checked and evaluated. |

| | |
|--|-------------|
| There are provisions for the repayment and recovery of aid that has been granted if the beneficiary has failed to comply with its obligations. | |
| A short explanation of how the transparency requirements (see Article 7 of the 2012 SGEI Decision) for the aid above SEK 15 million to undertakings that also have activities outside the scope of the SGEI are being complied with. In your answer please also include some relevant examples of information published for this purpose (e.g. some links to websites or other references), indicate whether you have a central website on which you publish this information for all aid measures concerned in your Member State (and if so provide the link to this website), or alternatively explain if and how the publication takes place at the level granting the aid (e.g. central, regional or local level). | |
| Not applicable. | |
| Amount of aid granted | |
| Total amount of aid granted (in SEK million). This includes all aid granted in your territory, including aid granted by regional and local authorities. (A+B+C) | |
| 2020 | 2021 |
| 54 | 49 |
| A: Total amount of aid granted (in SEK million) paid by national central authorities | |

| 2020 | 2021 |
|--|--|
| | |
| Additional quantitative information (e.g. number of beneficiaries per sector, average aid amount, size of the undertakings) | |
| 2020 | 2021 |
| 1 365 employers were granted aid to enable them to purchase workplace rehabilitation support to make it possible for employees to return to work. Average amount of aid per employer SEK 39 569. | 1 212 employers were granted aid to enable them to purchase workplace rehabilitation support to make it possible for employees to return to work. Average amount of aid per employer SEK 40 673. |

2.2.2 Social housing.

| Table 5: Compensation for organising and providing housing for the elderly. |
|--|
| |
| Clear and comprehensive description of how the respective services are organised in your Member State |
| Explanation of what kind of services in the respective sector have been defined as SGEI in your Member State. Please list the contents of the services entrusted as SGEI as clearly as possible. |
| <p>This aid is for construction companies, both public and private, which create and provide housing for the elderly. The aid is also intended for the adaptation of existing communal areas in order to help the elderly remain at home by means of greater accessibility.</p> <p>The aid is provided at a given sum per square metre of usable area (BOA) for:</p> <ul style="list-style-type: none"> • new construction or reconstruction of rented housing which counts as special housing within the meaning of Chapter 5, Section 5 of the Social Services Act [socialtjänstlag (2001:453)]; • new construction or reconstruction of rented housing for the elderly, on the regular housing market; • adaptation of communal areas (such as areas for residents' meals, communal activities, hobbies and recreation) in, or close to, |

| |
|--|
| <p>buildings which are rental housing, cooperative rental housing or tenant-ownership housing.</p> <p>There are two aid levels, depending on whether it is a question of new construction or reconstruction. The purpose of the aid is to ensure that more housing for the elderly is built, such as serviced housing and housing for those older than 65.</p> |
| <p>Explanation of the (typical) forms of entrustment. If standardised templates for entrustments are used for a certain sector, please attach them.</p> |
| <p>The awarding authority makes a preliminary decision to grant aid. The aid is paid out when the construction project is finished.</p> |
| <p>Average duration of the entrustment (in years) and the proportion of entrustments that are longer than 10 years (in %) per sector. Specify in which sectors SGEI were entrusted with a duration exceeding 10 years and explain how this duration is justified?</p> |
| <p>The awarding authority makes a preliminary decision to grant aid. The aid is paid out when the construction project is finished. For the construction and reconstruction of rental housing for the elderly, the beneficiary undertakes, for a period of 8 years, to make the housing available as housing for the elderly.</p> |
| <p>Explanation whether (typically) exclusive or special rights are assigned to the undertakings.</p> |
| <p>Not applicable.</p> |
| <p>Which aid instruments have been used (direct subsidies, guarantees, etc.)?</p> |
| <p>Direct subsidies.</p> |
| <p>Typical compensation mechanism as regards the respective services and whether a methodology based on cost allocation or the net avoided cost methodology is used.</p> |
| <p>In accordance with Section 11 of Ordinance 2016:848, the aid may not exceed the net costs, including a reasonable profit, for organising and providing apartment housing and communal areas on the terms laid down in the Ordinance.</p> |
| <p>Typical arrangements for avoiding and repaying any overcompensation.</p> |

| | |
|---|-------------|
| <p>The granting authority must check that the State aid will not exceed the total cost of production for the construction or reconstruction or adaptation of communal areas. If the aid exceeds the total cost of production, the aid amount must be reduced so that it is equivalent to the net cost including a reasonable profit.</p> <p>There are provisions for the repayment and recovery of granted aid if the beneficiary has failed to comply with its obligations.</p> | |
| <p>A short explanation of how the transparency requirements (see Article 7 of the 2012 SGEI Decision) for the aid above SEK 15 million to undertakings that also have activities outside the scope of the SGEI are being complied with. In your answer please also include some relevant examples of information published for this purpose (e.g. some links to websites or other references), indicate whether you have a central website on which you publish this information for all aid measures concerned in your Member State (and if so provide the link to this website), or alternatively explain if and how the publication takes place at the level granting the aid (e.g. central, regional or local level).</p> | |
| <p>Not applicable.</p> | |
| <p>Amount of aid granted</p> | |

| 2020 | 2021 |
| 77 undertakings received aid, which means that the average amount of aid per undertaking was SEK 6 411 386. The amount of the aid varied between SEK 14 591 and SEK 23 950 080. | 280 undertakings received aid, which means that the average amount of aid per undertaking was SEK 3 959 634. The amount of the aid varied between SEK 4 500 and SEK 23 900 184. |

| Table 6: Compensation to cover the costs of subletting by higher education institutions |
|---|
| |
| Clear and comprehensive description of how the respective services are organised in your Member State |
| Explanation of what kind of services in the respective sector have been defined as SGEI in your Member State. Please list the contents of the services entrusted as SGEI as clearly as possible. |
| <p>The aid is targeted at nine higher education institutions that sublet housing to students. The aid may be granted to cover the costs of providing residential accommodation in a municipality where there is an educational establishment or a neighbouring municipality, provided that there is a shortage of accommodation in this area.</p> <p>The aim of higher education institutions renting out accommodation is to create opportunities for student recruitment even when there is a housing shortage in the region. Higher education institutions should receive the full</p> |

| |
|--|
| <p>cost of their rental activities under rental legislation. Full cost recovery is not expected as the higher education institutions, for example, have costs for dwellings that are empty during the summer breaks. Normally, rental legislation prevents higher education institutions from compensating for these costs by charging higher rents.</p> <p>The Government considers that the renting activities, in the areas where there is a housing shortage, meet the criteria to be considered as a service of general economic interest. Renting activities are needed to meet the housing needs for students in regions where there is a lack of adequate accommodation.</p> <p>As a result of the pandemic in 2020 and 2021, the number of incoming students decreased, which meant that not all block-rented dwellings could be rented out. As a result of the lower occupancy rate, the shortfall in the activities increased in 2020 and 2021.</p> |
| <p>Explanation of the (typical) forms of entrustment. If standardised templates for entrustments are used for a certain sector, please attach them.</p> |
| <p>The granting authority (the higher education institution) takes the decision that costs relating to the economic activity of renting out residential accommodation, which cannot be covered under rental legislation, may be charged to the educational establishment's appropriations which are mainly intended for non-economic educational activities.</p> |
| <p>Average duration of the entrustment (in years) and the proportion of entrustments that are longer than 10 years (in %) per sector. Specify in which sectors SGEI were entrusted with a duration exceeding 10 years and explain how this duration is justified?</p> |
| <p>The aid is governed by Government Decision U2018/03635/UH for the period between 1 January 2019 and 31 December 2020. The aid is governed by Government Decision U2020/04021/UH for the period between 1 January 2021 and 31 December 2021.</p> |
| <p>Explanation whether (typically) exclusive or special rights are assigned to the undertakings.</p> |
| <p>Not applicable.</p> |
| <p>Which aid instruments have been used (direct subsidies, guarantees, etc.)?</p> |
| <p>Direct subsidies.</p> |

| | |
|---|--------------------|
| <p>Typical compensation mechanism as regards the respective services and whether a methodology based on cost allocation or the net avoided cost methodology is used.</p> | |
| <p>Higher education institutions decide whether to cover the net cost of renting with State funds. Higher education institutions are obliged to pursue their activities with full cost recovery, which means maximising revenues within the framework of rental legislation. The calculation of the net cost includes all actual costs and revenues arising from the letting with no supplement for profit.</p> | |
| <p>Typical arrangements for avoiding and repaying any overcompensation.</p> | |
| <p>The reimbursement is limited to actual costs with no supplement for profit. Higher education institutions also have an incentive to keep costs to a minimum, as any shortfall in rental activities is borne by the appropriations of the higher education institutions themselves, meaning that funds have to be allocated to cover deficits that could otherwise be used for education or research.</p> | |
| <p>A short explanation of how the transparency requirements (see Article 7 of the 2012 SGEI Decision) for the aid above SEK 15 million to undertakings that also have activities outside the scope of the SGEI are being complied with. In your answer please also include some relevant examples of information published for this purpose (e.g. some links to websites or other references), indicate whether you have a central website on which you publish this information for all aid measures concerned in your Member State (and if so provide the link to this website), or alternatively explain if and how the publication takes place at the level granting the aid (e.g. central, regional or local level).</p> | |

2.2.3 Other social services (if applicable).

| |
|--|
| Table 7: Medical insurance investigations |
| |
| Clear and comprehensive description of how the respective services are organised in your Member State |
| Explanation of what kind of services in the respective sector have been defined as SGEI in your Member State. Please list the contents of the services entrusted as SGEI as clearly as possible. |
| The aid is aimed at the regions which have the possibility to seek reimbursement for costs they incur for providing medical insurance investigations either themselves or through a contracted service to the Social |

Insurance Agency at the authority's request. Medical insurance investigations supplement, if necessary, existing medical evidence in cases handled by the Social Insurance Agency. The purpose of the investigations is to contribute to a legally sound review of the right to compensation under the Social Security Code, preferably sickness benefit. The investigation is not aimed at finding appropriate treatment measures for the individual.

A medical insurance investigation consists of a medical examination with mandatory elements and a specific method for assessing and describing the individual's ability to work. Depending on the needs in each individual case, interviews are also carried out by psychologists and/or tests are conducted by occupational therapists and physiotherapists. The interviews and the tests are standardised. The results of the investigation are delivered to the Social Insurance Agency in the form of a medical report.

When the Social Insurance Agency requests a medical insurance investigation, the regions are obliged to deliver one for a person residing in the region in question.

Medical insurance investigations are governed by the Act on medical insurance investigations [lag (2018:744) om försäkringsmedicinska utredningar]. The aid is governed by the Ordinance on medical insurance investigations [förordning (2018:1633) om försäkringsmedicinska utredningar].

Explanation of the (typical) **forms of entrustment**. If standardised templates for entrustments are used for a certain sector, please attach them.

The region that has received the request to carry out a medical insurance investigation provides the Social Insurance Agency with information on the cost of carrying out the investigation. The Social Insurance Agency then decides on the right to reimbursement of costs incurred as a result of the investigations.

Average duration of the entrustment (in years) and the proportion of entrustments that are **longer than 10 years** (in %) per sector. Specify in which sectors SGEI were entrusted with a duration exceeding 10 years and explain how this duration is justified?

The regions are obliged by law to provide the Social Insurance Agency with medical insurance investigations. The Act in question entered into force on 1 January 2019 and will apply until further notice. The Ordinance on medical insurance investigations (2018:1633) will expire on 31 December 2028.

| |
|--|
| Explanation whether (typically) exclusive or special rights are assigned to the undertakings. |
| The regions are obliged to provide the Social Insurance Agency with medical insurance investigations but do not have to carry out the service themselves. They may, instead, procure the service from other operators. |
| Which aid instruments have been used (direct subsidies, guarantees, etc.)? |
| Direct subsidy. |
| Typical compensation mechanism as regards the respective services and whether a methodology based on cost allocation or the net avoided cost methodology is used. |
| The region that incurred costs in connection with a medical insurance investigation must provide information to the Social Insurance Agency on its own initiative. The Social Insurance Agency pays compensation provided that the region has met the requirements for delivery specified in the Act on medical insurance investigations (2018:744) and the Ordinance on medical insurance investigations (2018:1633). |
| Typical arrangements for avoiding and repaying any overcompensation. |
| Regions may be reimbursed for their medical insurance investigation costs up to a ceiling which varies according to the type of cost. The ceilings are set out in the Ordinance on medical insurance investigations (2018:1633). Regions must provide proof of the cost of medical insurance investigations at the request of the Social Insurance Agency. The region is liable for repayment if it has received compensation unduly granted or in excess of the costs incurred by the region for the provision of medical insurance investigations. |
| A short explanation of how the transparency requirements (see Article 7 of the 2012 SGEI Decision) for the aid above SEK 15 million to undertakings that also have activities outside the scope of the SGEI are being complied with. In your answer please also include some relevant examples of information published for this purpose (e.g. some links to websites or other references), indicate whether you have a central website on which you publish this information for all aid measures concerned in your Member State (and if so provide the link to this website), or alternatively explain if and how the publication takes place at the level granting the aid (e.g. central, regional or local level). |

| | |

2.4 SGEI compensation not exceeding an annual amount SEK 15 million (Art. 2(1)(a))

2.4.1 Culture.

| Table 9: Compensation for publication of talking newspapers. |
|---|
| |
| Clear and comprehensive description of how the respective services are organised in your Member State |
| Explanation of what kind of services in the respective sector have been defined as SGEI in your Member State. Please list the contents of the services entrusted as SGEI as clearly as possible. |
| The measure is aimed at persons whose disability is such that they cannot read an ordinary daily newspaper and whose needs could not, in the absence of State aid, be satisfactorily met by the market. The compensation may be given for talking newspapers and receiving equipment and, especially, subscriptions that enable talking newspapers to be received via the internet. |
| Explanation of the (typical) forms of entrustment . If standardised templates for entrustments are used for a certain sector, please attach them. |
| The Swedish Agency for Accessible Media (Myndigheten för tillgängliga medier, MTM) has been tasked with improving access to the content of |

| |
|---|
| <p>newspapers for persons with a disability that prevents them from reading an ordinary daily newspaper. The Agency includes a special decision-making body for talking newspapers, Taltidningsnämnden [the Talking Newspaper Board].</p> <p>The board decides on aid for the publication of talking newspapers in accordance with the Ordinance on talking newspapers and receiving equipment [förordning (2013:9) om taltidningar och mottagarutrustning]. MTM is responsible for production and distribution, which is managed through contracted suppliers.</p> <p>Newspaper undertakings apply for compensation before starting publication of the talking newspapers to which the application relates. In the application, the applicant must, in particular, state the calculated preliminary costs of publishing the talking newspapers. The aid-granting authority then decides on the preliminary compensation.</p> |
| <p>Average duration of the entrustment (in years) and the proportion of entrustments that are longer than 10 years (in %) per sector. Specify in which sectors SGEI were entrusted with a duration exceeding 10 years and explain how this duration is justified?</p> |
| <p>One calendar year.</p> |
| <p>Explanation whether (typically) exclusive or special rights are assigned to the undertakings.</p> |
| <p>Not applicable.</p> |
| <p>Which aid instruments have been used (direct subsidies, guarantees, etc.)?</p> |
| <p>Direct subsidy.</p> |
| <p>Typical compensation mechanism as regards the respective services and whether a methodology based on cost allocation or the net avoided cost methodology is used.</p> |
| <p>The aid-granting authority decides on the amount of the compensation based on the talking newspaper's frequency of publication, the number of subscribers and the costs of marketing the newspaper. Compensation is provided only for those costs that have arisen after the aid-granting authority has decided that the publication of the talking newspaper confers entitlement to compensation.</p> |

| | |
|---|-------------|
| Typical arrangements for avoiding and repaying any overcompensation. | |
| <p>The compensation should not exceed the costs incurred by the newspaper undertaking the provision of the SGEI, that is to say the publication of talking newspapers and the provision of receiving equipment and special subscriptions to enable talking newspapers to be received via the internet. To prevent overcompensation and provide for the repayment of any such overcompensation, the compensation is paid in arrears based on accounts submitted by the newspaper publishers. At the request of the aid-granting authority, the newspaper undertaking must provide proof of the costs it has incurred for publishing its newspaper.</p> | |
| <p>A short explanation of how the transparency requirements (see Article 7 of the 2012 SGEI Decision) for the aid above SEK 15 million to undertakings that also have activities outside the scope of the SGEI are being complied with. In your answer please also include some relevant examples of information published for this purpose (e.g. some links to websites or other references), indicate whether you have a central website on which you publish this information for all aid measures concerned in your Member State (and if so provide the link to this website), or alternatively explain if and how the publication takes place at the level granting the aid (e.g. central, regional or local level).</p> | |
| Not applicable. | |
| Amount of aid granted | |
| Total amount of aid granted (in SEK million). This includes all aid granted in your territory, including aid granted by regional and local authorities. (A+B+C) | |

| 2020 | 2021 |
| | |
| Additional quantitative information (e.g. number of beneficiaries per sector, average aid amount, size of the undertakings) | |
| 2020 | 2021 |
| 42 newspaper undertakings received aid for 125 newspapers and the average amount of aid was SEK 49 832 per newspaper. | 41 newspaper undertakings received aid for 127 newspapers and the average amount of aid was SEK 43 945 per newspaper. |

2.4.2 Financial services.

| |
|---|
| Table 10: Compensation for the provision of basic payment services |
| |
| Clear and comprehensive description of how the respective services are organised in your Member State |
| Explanation of what kind of services in the respective sector have been defined as SGEI in your Member State. Please list the contents of the services entrusted as SGEI as clearly as possible. |

| |
|---|
| <p>Since 1 July 2014, county administrative boards have been able to grant State aid to providers of basic payment services under the Ordinance on State aid to providers of basic payment services [förordning (2014:139) om statligt stöd till tillhandahållare av grundläggande betaltjänster]. County administrative boards are regional authorities. The purpose of the aid is to ensure that everyone in society has access to basic payment services at reasonable prices.</p> <p>Basic payment services can be divided into three categories: cash withdrawals, payment transfer and business receipt management.</p> |
| <p>Explanation of the (typical) forms of entrustment. If standardised templates for entrustments are used for a certain sector, please attach them.</p> |
| <p>The county administrative boards grant State aid if the design requirements and conditions are fulfilled by the applicant. The county administrative board's decision to grant aid must contain at least the following information:</p> <ul style="list-style-type: none"> – the name of the applicant to which the decision relates, – the geographical location in which the activity is to be carried out, – the conditions for granting the aid, – the frequency with which the aid is to be paid to the provider, – the preliminary amount of the aid and the maximum aid amount during the decision's period of validity, and – the period for which the decision applies. <p>The beneficiary undertaking is considered to have been entrusted with providing basic payment SGEIs.</p> |
| <p>Average duration of the entrustment (in years) and the proportion of entrustments that are longer than 10 years (in %) per sector. Specify in which sectors SGEI were entrusted with a duration exceeding 10 years and explain how this duration is justified?</p> |
| <p>Average duration of 2 years; no aid granted for a period longer than 10 years.</p> |
| <p>Explanation whether (typically) exclusive or special rights are assigned to the undertakings.</p> |

| |
|---|
| Not applicable. |
| Which aid instruments have been used (direct subsidies, guarantees, etc.)? |
| Direct subsidy. |
| Typical compensation mechanism as regards the respective services and whether a methodology based on cost allocation or the net avoided cost methodology is used. |
| <p>Net avoided cost methodology.</p> <p>The aid granted must correspond to the provider's accounted-for net costs for providing basic payment services. The net costs must be calculated in accordance with generally accepted accounting principles. The net costs are calculated as the difference between costs and revenue, as indicated below.</p> <p>In calculating net costs, account must be taken of all costs directly attributable to the provision of basic payment services. Account must be taken of costs common to providing the basic payment services and to any other activity if the costs arise from providing basic payment services. Investment costs must be included in the calculation of net costs if the investment is necessary for providing basic payment services.</p> <p>In calculating net costs, account must be taken of all revenue directly attributable to providing basic payment services.</p> |
| Typical arrangements for avoiding and repaying any overcompensation. |
| <p>The county administrative board will have an established procedure for paying aid and it pays the granted aid to the provider on a regular basis, provided that relevant supporting documents (verifying costs and revenue for the relevant period) have been submitted.</p> <p>If the provider engages in activity in addition to that of providing basic payment services, the provider's internal accounting must show clearly which costs and revenue are attributable to basic payment services.</p> <p>The county administrative board must check regularly that the granted aid does not exceed the net costs. In the course of such checks, the paid-out aid must be compared with the provider's accounted-for revenue and costs for providing basic payment services in the relevant period. The checks must be carried out at least once every 3 years. If, in the course of a check, it emerges that a provider has obtained aid in excess of the net costs, the corresponding amount may be deducted from the aid to be provided at the</p> |

| | |
|---|------|
| <p>next payment date. This applies on condition that the excess amount does not exceed 10% of the granted aid in the course of 1 year.</p> <p>Once the aid ceases, the county administrative board must carry out a final check to ensure that the provider has not received aid in excess of the net costs.</p> | |
| <p>A short explanation of how the transparency requirements (see Article 7 of the 2012 SGEI Decision) for the aid above SEK 15 million to undertakings that also have activities outside the scope of the SGEI are being complied with. In your answer please also include some relevant examples of information published for this purpose (e.g. some links to websites or other references), indicate whether you have a central website on which you publish this information for all aid measures concerned in your Member State (and if so provide the link to this website), or alternatively explain if and how the publication takes place at the level granting the aid (e.g. central, regional or local level).</p> | |

|---|
| |
| Clear and comprehensive description of how the respective services are organised in your Member State |
| Explanation of what kind of services in the respective sector have been defined as SGEI in your Member State. Please list the contents of the services entrusted as SGEI as clearly as possible. |
| <p>Since 2 August 2018, the Swedish Post and Telecom Authority [Post- och telestyrelsen] (PTS) has been able to grant State aid to undertakings to implement certain measures for secure and robust electronic communications under the Ordinance on State aid for secure and robust communications [förordning (2018:1300) om statligt stöd för driftsäkra och robusta elektroniska kommunikationer]. The objective of the aid is to protect electronic communications from serious threats and challenges. For example, an operator applies for aid to provide a point of access with the help of a back-up electric generator with the accompanying tank. The service of general interest purchased by PTS is the ability to operate this particular point of access for a certain period of time even in the event of a failure of the primary electricity network. The aid goes towards the work carried out to achieve this and when the work has been carried out, the capacity is delivered without any additional funding.</p> |
| Explanation of the (typical) forms of entrustment . If standardised templates for entrustments are used for a certain sector, please attach them. |
| The Swedish Post and Telecom Authority can grant State aid subject to the availability of funds and if the design requirements and conditions are met by the applicant. |
| Average duration of the entrustment (in years) and the proportion of entrustments that are longer than 10 years (in %) per sector. Specify in which sectors SGEI were entrusted with a duration exceeding 10 years and explain how this duration is justified? |

| |
|--|
| No decisions exceed 10 years. Decisions are normally taken with a 10-year commitment for the undertaking. |
| Explanation whether (typically) exclusive or special rights are assigned to the undertakings. |
| Not applicable. |
| Which aid instruments have been used (direct subsidies, guarantees, etc.)? |
| Direct subsidy. |
| Information on the typical compensation mechanism for the respective services. Please state also whether a cost allocation method or the net avoided cost method has been used. |
| <p>The net avoided cost method has been used. The compensation must be cost-based and must not exceed the net cost of the aided activity. The costs should be calculated on the basis of generally accepted cost accounting principles, as follows:</p> <p>(a) If the activity of the beneficiary is limited to the subsidised activity, all costs may be taken into account.</p> <p>(b) If the beneficiary also carries out other activities, only costs related to the subsidised activity shall be taken into account.</p> <p>(c) The costs may include all direct costs of the subsidised activity as well as an appropriate contribution to general costs (overheads).</p> <p>(d) Investment costs, in particular for infrastructure, may be taken into account if they are necessary for the subsidised activity.</p> <p>The revenue to be taken into account when calculating the net cost is the total revenue obtained in connection with the subsidised activity. The beneficiary may make a mark-up for a reasonable profit. The profit may be calculated only on the basis of staff costs.</p> |
| Typical arrangements for avoiding and repaying any overcompensation. |
| PTS makes aid payments on the basis of specified payment requests. In the case of large projects, PTS also has quarterly follow-ups or similar reviews where they examine past and future measures. When action is complete, the beneficiary must submit a final account of the measures. The final account must include: |

| | |
|--|--------------------|
| <ul style="list-style-type: none"> – a summary description, including a description of the measures, deviations from the project plan, any key choices in the implementation of the measures, experiences and lessons learned, and a description of how the measures will be managed over time in order to maintain capacity; – an inspection report (if any); – a financial statement covering the costs incurred in implementing the measures. The financial statement must indicate the items have been financed with the aid and the scope of this. <p>After PTS has approved the final accounts, the capacity maintenance obligation will begin (usually a period of 10 years). The beneficiary is obliged to submit accounts every 3 years and to provide technical and financial evidence in accordance with PTS's instructions once the capacity maintenance obligation has expired. The repayment obligation is also regulated. PTS also has the right to request and verify technical and financial evidence related to the subsidised activities either by itself or with the help of, for example, an audit firm.</p> | |
| <p>A short explanation of how the transparency requirements (see Article 7 of the 2012 SGEI Decision) for the aid above SEK 15 million to undertakings that also have activities outside the scope of the SGEI are being complied with. In your answer please also include some relevant examples of information published for this purpose (e.g. some links to websites or other references), indicate whether you have a central website on which you publish this information for all aid measures concerned in your Member State (and if so provide the link to this website), or alternatively explain if and how the publication takes place at the level granting the aid (e.g. central, regional or local level).</p> | |
| <p>None of the undertakings receive aid in excess of SEK 15 million.</p> | |

| Table 13: Aid to maintain a good supply of medicines throughout the country |
| |
| Clear and comprehensive description of how the respective services are organised in your Member State |
| Explanation of what kind of services in the respective sector have been defined as SGEI in your Member State. Please list the contents of the services entrusted as SGEI as clearly as possible. |

| |
|--|
| <p>Pharmacies in sparsely populated areas are able to apply for a financial subsidy. The purpose of the subsidy is to maintain a good supply of medicines throughout the country by giving people in sparsely populated areas easier access to pharmacy services. To be entitled to reimbursement, a pharmacy must be seen to have performed the outpatient pharmacy SGEI.</p> <p>A pharmacy needs to fulfil a number of criteria in order to obtain a subsidy. For example, the pharmacy must:</p> <ul style="list-style-type: none"> • be located more than 20 kilometres from any other pharmacy; • have had sales revenue from prescription medicines amounting to between SEK 1 million and SEK 15 million for the financial year; and • have had its premises open so that consumers have had access to prescription medicines during all calendar months (otherwise, aid is granted in relation to the number of calendar months during which the pharmacy has been open). <p>The aid is governed by the Ordinance on aid to the outpatient pharmacy SGEI [förordning (2013:80) om bidrag till öppenvårdsapoteksservice av allmänt ekonomiskt intresse].</p> |
| <p>Explanation of the (typical) forms of entrustment. If standardised templates for entrustments are used for a certain sector, please attach them.</p> |
| <p>The granting authority takes a decision on the payment of subsidies at the request of employers who may be eligible for subsidies.</p> |
| <p>Average duration of the entrustment (in years) and the proportion of entrustments that are longer than 10 years (in %) per sector. Specify in which sectors SGEI were entrusted with a duration exceeding 10 years and explain how this duration is justified?</p> |
| <p>An application for a subsidy must have been received by the granting authority no later than 1 March in respect of services provided during the previous year. Subsidies are paid in arrears for one calendar year at a time.</p> |
| <p>Explanation whether (typically) exclusive or special rights are assigned to the undertakings.</p> |
| <p>A precondition in order for a pharmacy to obtain aid is that it should have relevant licences under the Act on trade in pharmaceutical products [lag (2009:366) om handel med läkemedel]. The undertakings have not been allocated any other exclusive or special rights.</p> |

| |
|--|
| Which aid instruments have been used (direct subsidies, guarantees, etc.)? |
| Direct subsidies. |
| Information on the typical compensation mechanism for the respective services. Please state also whether a cost allocation method or the net avoided cost method has been used. |
| The pharmacies that fulfil the criteria and whose needs are greatest will be given subsidies reserved for sparsely populated areas. The subsidy is calculated on the basis of sales of prescription medicines at the pharmacy. There is a ceiling based on the pharmacy's profits from its overall operation, which ensures that no pharmacy is overcompensated. A pharmacy whose sales amount to between SEK 1 million and SEK 15 million can obtain a maximum of SEK 715 000 in subsidies. |
| Typical arrangements for avoiding and repaying any overcompensation. |
| The aid scheme includes a ceiling (see previous question). A pharmacy applying for a subsidy must submit information concerning its operation, revenues and costs, etc. In the case of aid that has already been granted, conditions relating to repayment and recovery apply if the beneficiary has not fulfilled its obligations. |
| A short explanation of how the transparency requirements (see Article 7 of the 2012 SGEI Decision) for the aid above SEK 15 million to undertakings that also have activities outside the scope of the SGEI are being complied with. | Table 14: Compensation for developing standards for activities under the Act on support and service to certain persons with disabilities [lag (1993:387) om stöd och service till vissa funktionshindrade]. |
| |
| Clear and comprehensive description of how the respective services are organised in your Member State |
| Explanation of what kind of services in the respective sector have been defined as SGEI in your Member State. Please list the contents of the services entrusted as SGEI as clearly as possible. |
| <p>The Swedish Institute for Standards [Svenska institutet för standarder] (SIS), which is a non-profit association that manages and coordinates standardisation in Sweden, was granted funding to develop standards for activities under the Act on support and service to certain persons with disabilities (1993:387) and standards on person-centred care and to lead the work on developing European standards for social alarm systems and quality in elderly care.</p> <p>The purpose of developing service standards for services to people with disabilities is, on the one hand, to support municipalities and individual providers in their quality development and, on the other hand, to support municipalities in the procurement of activities in this area. Standards can also be used in the follow-up of activities. The development of standards must be informed by principles of equality and in consultation with a diverse group of relevant stakeholders. User organisations are involved in the work.</p> |
| Explanation of the (typical) forms of entrustment . If standardised templates for entrustments are used for a certain sector, please attach them. |
| The Swedish Government has granted funds at the request of SIS. |
| Average duration of the entrustment (in years) and the proportion of entrustments that are longer than 10 years (in %) per sector. Specify in which sectors SGEI were entrusted with a duration exceeding 10 years and explain how this duration is justified? |
| The funds have been granted for one year at a time since 2014. |
| Explanation whether (typically) exclusive or special rights are assigned to the undertakings. |
| SIS has not been given any exclusive or special rights in the area of developing standards for services to people with disabilities. |

| | |
|--|-------------|
| The SIS has been designated by the Government as the national standardisation body and it is Sweden's member of the European Committee for Standardisation (CEN) and the International Organization for Standardisation (ISO). | |
| Which aid instruments have been used (direct subsidies, guarantees, etc.)? | |
| Direct subsidy. | |
| Information on the typical compensation mechanism for the respective services. Please state also whether a cost allocation method or the net avoided cost method has been used. | |
| The SIS's application was examined by the Legal, Financial and Administrative Services Agency. The subsidy is intended to cover part of the cost of developing a product of general economic interest. | |
| Typical arrangements for avoiding and repaying any overcompensation. | |
| A decision by the Swedish Government to grant funds contains, for example, a reporting requirement and a requirement that the beneficiary submit accounts. There is also the option of recovery and repayment if the beneficiary has not fulfilled its obligations. | |
| A short explanation of how the transparency requirements (see Article 7 of the 2012 SGEI Decision) for the aid above SEK 15 million to undertakings that also have activities outside the scope of the SGEI are being complied with. | Explanation of what kind of services in the respective sector have been defined as SGEI in your Member State. Please list the contents of the services entrusted as SGEI as clearly as possible. |
| The aid targets RISE Research Institutes of Sweden AB (RISE, organisation number 556464–6874). RISE will apply to become and will, during the period between 1 January 2021 and 31 December 2031, act as a notified body ('the Service') in Sweden under Regulation (EU) 2017/745 of the European Parliament and of the Council of 5 April 2017 on medical devices (MDR), which enters into force on 26 May 2021. The aim is to ensure sufficient capacity to certify and issue the CE marking for new medical |

| |
|---|
| devices and to meet society's needs for medical devices. RISE is instructed, upon application and approval as a notified body, to perform the Service starting as soon as possible after the entry into force of the MDR. |
| Explanation of the (typical) forms of entrustment . If standardised templates for entrustments are used for a certain sector, please attach them. |
| The Government authorised the Legal, Financial and Administrative Services Agency to take a decision to allocate funds to RISE under Commission Decision 2012/21/EU in order to enable the mission. The task also includes making sure that the conditions for reimbursement are met and ensuring follow-up. The Legal, Financial and Administrative Services Agency subsequently decided on the allocation of funds to RISE in accordance with the authorisation. |
| Average duration of the entrustment (in years) and the proportion of entrustments that are longer than 10 years (in %) per sector. Specify in which sectors SGEI were entrusted with a duration exceeding 10 years and explain how this duration is justified? |
| Funds have been allocated for 2021 for entrustments in the medical device audit sector. The entrustment is for 10 years. |
| Explanation whether (typically) exclusive or special rights are assigned to the undertakings. |
| RISE has not been granted exclusive or special rights. Other undertakings are free to apply to become a notified body under Regulation (EU) 2017/745 of the European Parliament and of the Council of 5 April 2017 on medical devices (MDR). |
| Which aid instruments have been used (direct subsidies, guarantees, etc.)? |
| Direct subsidy. |
| Information on the typical compensation mechanism for the respective services. Please state also whether a cost allocation method or the net avoided cost method has been used. |
| According to Government Decision N2020/02852, the compensation to RISE is to be calculated on the basis of the difference between the cost of providing the Service and the revenue from the Service. The compensation may not exceed what is necessary to cover the net cost of performing the Service, including a reasonable profit. Furthermore, the Service must be carried out under market conditions and based on transparent and non-discriminatory principles. In particular, RISE must, when providing the |

| | |
|--|-------------|
| Service, apply procedures ensuring that competition in the market is not impeded or distorted. | |
| Typical arrangements for avoiding and repaying any overcompensation. | |
| <p>According to Government Decision N2020/02852, the Legal, Financial and Administrative Services Agency is to verify annually, on the basis of the separate cost and revenue accounts related to the Service as stated in RISE's annual report, whether there has been overcompensation for the performance of the Service and the Agency will recover any overcompensation pursuant to Article 6 of the SGEI Decision no later than 6 months after the end of the financial year in question.</p> <p>In accordance with Article 8 of the SGEI Decision, the Legal, Financial and Administrative Services Agency will, during the provision of the Service and for at least 10 years from the end of the Service provision period, keep available all the information necessary to determine whether the compensation was granted in line with the SGEI Decision.</p> <p>The Legal, Financial and Administrative Services Agency will provide the Government Offices [Regeringskansliet] (Ministry of Enterprise and Innovation [Näringsdepartementet]) with the information required under Article 9 of the SGEI Decision.</p> | |
| A short explanation of how the transparency requirements (see Article 7 of the 2012 SGEI Decision) for the aid above SEK 15 million to undertakings that also have activities outside the scope of the SGEI are being complied with. 3. Description of the application of the 2012 SGEI Framework

3.1 Airports and ports with average annual traffic above the limit set in Art. 2(1)(e)

Table 17: Airports with average annual traffic above the limit set in Art. 2(1)(e)

Clear and comprehensive description of how the respective services are organized in your Member State

Explanation of what kind of services in the respective sector have been defined as SGEI in your Member State. Please list the **contents of the services entrusted** as SGEI as clearly as possible.

The general operation of a municipally-owned airport.

The content of the service varies somewhat from one airport to another but, generally speaking, the service involves keeping the airport open and being in a position to receive all carriers that want to use the airport on commercial terms. There is also a requirement to provide, in addition to the basic infrastructure, services such as baggage handling, passenger check-in, refuelling, rescue services, perimeter protection and de-icing of aircraft to the extent required for commercial flights to be operated at the airport.

Nothing to report.

5. Other issues

a. We kindly invite you to indicate whether your authorities have experienced difficulties in applying the 2012 SGEI Decision and ask you to in particular consider the following issues:

- drawing up an entrustment act that complies with Article 4 of the SGEI Decision;
- specifying the amount of compensation in line with Article 5 of the SGEI Decision;
- determining the reasonable profit level in line with Article 5(5)-(8) of the SGEI Decision;
- regularly checking overcompensation as required by Article 6 of the SGEI Decision.

Please be as specific as possible in your reply, include relevant examples and, if applicable, the sector for which the difficulties are (most) relevant.

b. We kindly invite you to indicate whether your authorities have experienced difficulties in applying the 2012 SGEI Framework and ask you to in particular consider the following issues:

- carrying out a public consultation in line with paragraph 14 of the SGEI Framework,
- complying with public procurement rules in line with paragraph 19 of the SGEI Framework,
- determining the net avoided cost as required by paragraphs 25-27 of the SGEI Framework,
- determining the reasonable profit level in line with paragraphs 33-38 of the SGEI Framework.

Please be as specific as possible in your reply, include relevant examples and, if applicable, the sector for which the difficulties are (most) relevant.
