Hello,

Existing support tools for organic farming do not make it possible to reach the 25 % organic surface by 2030. The European Commission must amend the regulatory framework allowing public authorities to support organic farming outside CAP aid. In particular, by including aid to maintain AB in the list of aid exempted from prior notification and validation by the European Commission. If AB is included in this list of exempted aid, local authorities who wish to do so (no obligation) will have the legal basis to do so, without having to make considerable efforts to notify aid to the Commission.
