**Subject:** HT.5788\_Reply\_from\_an\_organisation

**Dear Mr/Ms,**

**please find enclosed a proposal from the Spanish Federation of Wood Industries — FEIM.**

**Proposal REQUEST** to use the text of the National Framework of the previous RDP to define the targeted investments: *“Support may be granted for investments related to the use of wood as a raw material or energy source corresponding to a **first processing of wood, prior to industrial transformation leading to final processed products and provided that they are carried out on a small scale.** This processing condition shall be expressly established through the size of the enterprise, so that the beneficiary is SME, mycro-enterprise or small or medium-sized enterprises as defined in Commission Recommendation 2003/361/EC. ”* removing the **limitation on 1nd and 2nd wood processing activities by deleting Article 42 (7) and, consequently, the definition in Article 2 of definitions prior to industrial processing**of timber.

This proposal would maintain, at European level, the conditions for access to aid for both restocking and sawmills in the current EAFRD programming period 2014-2020 (extended to 2022). In this way, at least we will have no more constraints than those that can be established by Spain’s PEPAC.

Thank you very much  
Olga Moro-Coco
